

A NEWSPAPER BY AND FOR Y-12 EMPLOYEES OF CARBIDE AND CARBON CHEMICALS COMPANY A DIVISION OF UNION CARBIDE AND CARBON CORPORATION

Vol. 9, No. 29

OAK RIDGE, TENNESSEE

Wednesday, July 20, 1955

Refrigeration Group Has Important Job

One of the most important jobs in Y-12 — the maintenance of equipment required to keep buildand machines at stated constant temperatures—falls to one of the smallest groups in the Maintenance Division of the plant. It is the Refrigeration Mainte-nance Group of the Field Mainte-nance Department and is staffed by a foreman and only five employees.

This maintenance group keeps in repair all types of air condi-tioning equipment throughout the Y-12 Plant-and also the water coolers and household type re-frigerators in various buildings. The air conditioners range in size from one-half ton capacity units to giants of 1,300 ton capacity. Incidentally, the description of the capacity of an air conditioner is the machine's ability to melt the same number of tons of ice in 24 hours as the capacity listed for the equipment.

The importance of air condition-ing is reflected in use in many parts of the plant where close tolerances in temperatures is required. In some instances a year around temperature is required that should not vary more than a fraction of a degree and when variance of two or three degrees might cause serious consequences.

Throughout the plant are 319 air conditioning units in addition to the 230 water coolers and household refrigerators that are maintained by the Refrigeration Maintenance Group. Most of the air conditioners operate to maintain temperatures from 20 to 40 degrees, Fahrenheit.

Foreman B. F. Nicley is the senior of the Refrigeration Maintenance Group from the standpoint of Company Service, having come to work in Y-12 back on September 21, 1943. R. E. Mellon is next in line, having been a Y-12er since January 5, 1944. The other members of the group and their employment dates are H. A. Garrett, June 29, 1949; G. G. Wilson, October 1, 1952; Don L. Patterson, February 8, 1954; and R. L. Adkins, January 25, 1955.

The group works on a straight day schedule, but any member is subject to call in case of an emerwork. Fortunately

UCC To Play Leading Role At "Atoms For Peace" Meeting

Geneva, Switzerland, will be the atomic capital of the world in mid-August when nuclear scientists gather there to attend the International Conference on Peaceful Uses of Atomic Energy. The conference, sponsored by the United Nations, was suggested in 1953 by President Eisenhower. Scientists from many countries all over the world will take part in this his
Foreman Nicley, these instances toric event. Scientific papers on

Foreman Nicley, these instances many aspects of atomic energy

have been rare.

The foreman explained that the long-range work schedule for the group calls for most major overhauls being done during the win-ter months when the requirements for air conditioning are not as stringent as in the hot days of summer. As a result, Nicley says, the machines are placed in first class condition that result in their running through the summer months with a minimum chance of needing any major adjustments or repairs. This long-range scheduling is a big factor in maintaining plant efficiency.

The little group is rightly proud of its safety and attendance rec-ords. Since 1950, Foreman Nicely pointed out, there has not been a disabling injury among members of the group and only five minor

injuries have occurred.

As a part of the Field Maintenance Department, the Refrigera-tion Maintenance Group is under the jurisdiction of Maintenance Division Superintendent R. A. Walker. J. W. Ebert is Assistant Superintendent of the Maintenance Division for General Maintenance and W. E. Heckert is Field Maintenance Department Superin Maintenance Department Superin-

ACS To Hold Picnic This Saturday, July 23

The American Chemical Society will hold its annual picnic this Saturday, July 23, at 5:00 p.m. at Big Ridge State Park. There will be all types of recreation for the children as well as the adults.

The affair will be a pot luck supper with members bringing

their main dish, salad and dessert sufficient for the family and one extra person. Single people with-out cooking facilities may bring potato chips or pickles. Everyone is to bring their own plates and eating utensils. The ACS will furrequiring prompt repair nish soft drinks and ice cream.

ship.
Union Carbide will also be represented in the industrial exhibits located in the Palais des Exhibi-tions in Geneva. The Corporation, with its European affiliate, Union Carbide Europa, S.A., will show, by means of a series of graphic displays, how its Divisions and Units contribute to the atomic program, in almost every aspect, from ore to end use. Among these contributions are: uranium concentrates supplied to the A.E.C. by United States Vanadium Company from its mines and mill in western Colorado; super high-purity graphite and carbon furnished by National Carbon; special metals such as zirconium and titanium, as well as stainless steels and hightemperature, corrosion - resistant alloys made by Electromet and Haynes Stellite; plastics developed by Bakelite, including the fluorocarbon plastics which have great use in the atomic energy program; nitrogen, argon, and other industrial gases furnished to atomic energy installations by Linde; and finally the chemicals, widely used

will be presented before the delegates, and exhibits will graphically illustrate mankind's progress in

U. S. Presents Exhibit
Perhaps the most striking exhibit will be sponsored by the United States. Here, for the first time, the public will be allowed to view a full cools view a full-scale, operating atomic reactor. This reactor, of the pool type, was designed and built, and will be operated, by the Oak Ridge National Laboratory, which Union Carbide runs for the U. S. Atomic Energy Commission.
A pool-type reactor is so called

the nuclear sciences

because it operates in a large container of purified water, in this case a cylindrical steel tank 10 ft. in diameter and 22 ft. deep. The water acts as a shield against radiation, and as a moderator to slow down neutrons given out by the uranium fuel, thus aiding in developing the chain reaction.

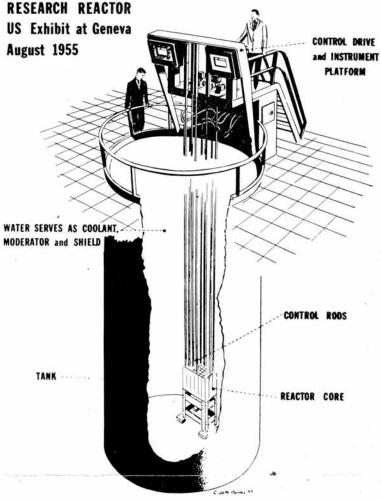

The reactor is not designed to produce power but can be used for many research and educational purposes. The manufacture of radioisotopes—those unusual variations of the elements which have been found so useful in medicine, agriculture, and industry—is also possible in this reactor.

The reactor will be housed in a special building on the grounds of the Palais des Nations where thousands of delegates will take part in assemblies and scientific dis-

cussions at the conference.

The reactor was airlifted June
30 from Knoxville, Tennessee, in two U. S. Government aircraft.
The planes, a C-124 and C-54
supplied by the Military Air
Transport Service, were expected to arrive in Geneva July 1 with their 15 tons of reactor compo-nents. The framework for the reactor was dispatched earlier by

in the processing operations as well as in the production and refinement of uranium and other atomic materials.

HERE IS A CUTAWAY DIAGRAM OF THE "SWIMMING-POOL" REACtor, one of the most interesting features of the United States exhibits at the Geneva Conference.

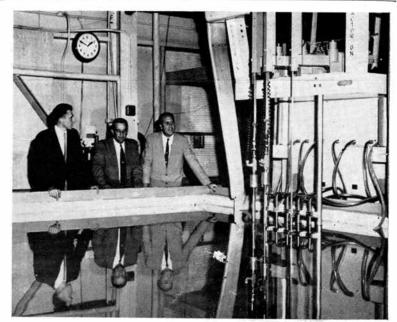

NSA Group Observe Third Anniversary

The Oak Ridge Chapter of the The Oak Ridge Chapter of the National Secretaries Association celebrated its third birthday on July 11 at the regular monthly business meeting at the home of Mrs. William T. Burnett, Jr., 112 Euclid Circle in Oak Ridge.

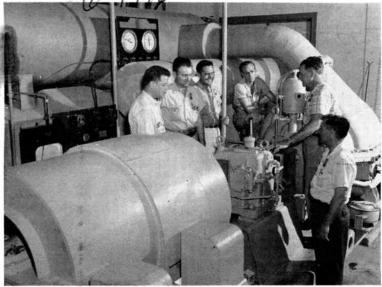

Present membership in the chapter includes 38 secretaries from Oak Ridge, Knoxville, Lenoir City, Kingston and Rockwood, and four members who are out of

Y-12 Employees Pick Awards

Safety award selection cards of eligible Carbide employees in the Y-12 Plant Area started rolling into the Y-12 Safety Department offices last week. Approximately 6,000 Carbide employees must complete their selection by Friday of this week, July 22.

Each eligible person is to select one item from the 11 articles which are on display at the East, North, Central, West and Bear Creek entrances to the plant. Everyone is urged to designate the correct portal where the awards

will be picked up.

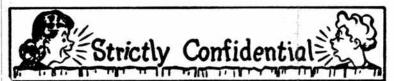

A new method of selection was used in determining the 11 articles which are on display at the various portals. A poll was conducted by the Safety Department of all eligible employees and 1,120 people responded to the new method of selection. Every eligible employee in the Y-12 Plant Area had an opportunity to voice an opinion on the 32 articles from which the 11 was chosen.

The awards are for the 15th Carbide Safety Period of more than 1,500,000 man-hours of plant operations established in the Y-12 Plant Area extending from March 12 through May 8 inclusive, when 2.034.575 hours of work were performed without a disabling injury. The period without a lost time accident was 58 days.

Get-well wishes were sent the following Y-12 employees who were patients last week in the Oak Ridge Hospital:

Ann Strunk and B. R. German, Colex Operations; H. L. Spurgeon, Transportation; Robert D. Smith, Stores; Joseph E. Morgan, Guard; Will R. Kelly, Planning and Estimating; M. D. Story, Electrical Maintenance; Cleveland Cannon, Janitors; W. C. Gordon, B Mechanical Operations; V. W. Arms, Research Services; W. H. Hutcheson, E Mechanical Operations.

10 Years Service

Congratulations to the following Y-12 employees who will complete 10 years of Company Service within the next few days:

William Penn, Project Construc-

ion, July 24.

Joe T. Thomas, Field Maintenance, July 25

Charles O. Poland, Stores, July

Roy Ivery, Buildings and Grounds, July 27.

G. L. Tate, General Machine Daily Sessions Feature

The Oak Ridge Physics Seminar is holding a special series of lec-tures this week. Dr. Anthony M. Lane, who is with the Atomic Energy Research Establishment in Harwell, England, is the featured speaker at each meeting. Each session is scheduled to start at 11:00 a.m. in the auditorium of Bldg. 4500, Oak Ridge National Laboratory.

The subject for each session be-ginning today, Wednesday, July 20, follows:

"The Complex Potential Model of Neutron-Nucleus Scattering and Its Quantum Mechanical Interpretations.'

Thursday, July 21—"Quantum Mechanical Prediction of the Properties of Neutron-Nucleus Scatter-(Lecture three continued).

The subject for Friday, July 22, is to be announced.

Carbide Wives Club Set Meeting For July 20

The next monthly card party and meeting of the Carbide Wives will be held at 7:30 o'clock tonight, Wednesday, July 20, in the East Lounge of the Ridge Recreation Hall. Bridge and canasta will be played at the party.

Mrs. R. A. Hamrick is the executive board member in charge of the party tonight. She will be assisted by Mrs. J. E. Longendorf-er, Mrs. R. W. Jackson, Mrs. Virginia C. Malone and Mrs. J. M. Smith.

All wives of Carbide personnel as well as the female employees of the company are invited to attend each meeting of the club.

ENTREES FOR CAFETERIA SPECIAL LUNCHES JULY 21, 26, GIVEN

Chopped sirloin steak with mushroom sauce will be the entree for the 50-cent Special Lunch at the Y-12 Cafeteria tomorrow, Thursday, July 21.
On next Tuesday, July 26, ham
loaf with pineapple sauce will
be featured as the main dish. Each lunch includes a vegetable, choice of salad or dessert and rolls and butter.

THE FOOD WAS FINE AND PLENTIFUL AT THE A SHIFT PICNIC AT Cove Lake Park last week. Several A Shift employees with their families and guests are shown above getting ready to put away some of the fine

food. (More pictures of the A Shift picnic will appear in the paper next week).

Heated Play Noted In Softball Loops; Sunflowers Win Two Big Contests

Heated action took the spotlight in the Y-12 Plant Softball Leagues last week at Pinewood Park. A full schedule of games was not played due to rainy weather and

wet grounds, but several good tussles were staged.

The Ridgerunners, who are leading the National League, were idle as was the high flying Bombers team, who are currently in first place in the American loop.

Sunflowers Win Two

The Sunflowers, managed by Curt Ridings, trimmed Joe Del-monte and his Wildcats by 9 to 2 in a well played game. The Wildjumped to a one run lead in the first inning and held on to the lead until the fourth frame rolled around when the Sunflowers scored four tallies. The Sunflowers added two insurance runs in the fifth canto and sailed in with the win. McFarland, Sunflower chunker, allowed the losers just three hits and walked one man. The Sunflowers also trimmed ADP by 16 to 6 in a slugfest. The Sun-flowers collected 15 hits in this game with Terry being the leading batsman by slamming two home runs, one in the third inning and one in the fourth frame with three men on base. Ellis gave up seven hits to the losers.

The Uranium Control Junior Varsity got a win last week as Morris Perry and Dick Garland combined talents to hurl a threehitter at the Steamers and a 12 to 4 victory. UCJV took off with four runs in the second inning then added five in the fourth frame to take the victory. Bill Stanton cracked out a long home run and a double to lead UCJV at the plat-

Bums Bow To Beta Four

In the National League of Y-12 softballers, Beta Four kept on the winning trail by banging out a 9 to 5 win over the Bums, who are headed by Andy Anderson. Haw-kins twirled for Beta Four while Robert Smith and Jim Turner shared mound duties for the Bums. Beta Four scored two runs in the first inning with the Bums countering with one tally, then in the third frame Beta Four came to life with four big markers and Hawkins shut the door for the rest of the ball game. Beta Four collected only six hits, but four errors by the Bums was all she wrote. Dyer led the winners by blasting out a home run and a single.

appearance in quite some time by last seen.

winning over the Bums by 8 to 6 in a close game all the way. Hits were just about even with the Madcaps getting seven safeties and the Bums collecting eight bingles. Each team committeed one error. The Madcaps got off to a good start by scoring three runs in the top of the first inning but the Bums came back strong in the bottom of the third by scoring five markers. Things rocked along pretty much even until the sixth when the Madcaps scored two clinching runs. Houser led the winners with a homer and a triple.

League standings and results as of last Thursday night, July 14, follow:

Lawley and William "Bill" Hill. Players absent when the picture was made included Leonard Nance, Gene Ware and G. L. Hatcher.

Next Y-12 Golf Tourney At Deane Hill On July 23

A crowd of Y-12 golfers is expected to enter the next Y-12 Golf Tournament which will be held this Saturday, July 23, at the Deane Hill Golf and Country Club in Knoxville. Tee-off time will begin at 7 a.m. with all players being off by 8:30 a.m. The Recreation Department will award a total of 21 prizes to the lucky winners in the

A hole-in-one contest will be the feature event of the tournament. The event will be staged on Hole Number Two. First, second and third places will be given to the three golfers getting nearest the cup with their drives.

All golfers entering the tourna-ment will be divided into three divisions of play. Division I will be all players with handicaps from zero through 12. Golfers with handicaps from 13 through 22 will make up Division II. Division III will be everyone with handicaps from 23 through 36.

Prizes in Division No. I will be awarded first and second places in

gross and net scores.

The Division No. 2 prizes will be given to the first three gross and net scores.

Prizes in Division No. 3 will be awarded to the first and second place finishers in gross and net

scorers.
First and second place prizes

is \$3.00.

also will be awarded to scorers who post the least number of putts on the front and back nine. Handicaps for the tournament may be obtained from the official scorer on the morning of the tournament. Green's fee at Deane Hill

Prize winners in the last Y-12 Prize winners in the last Y-12 Tournament which was held at the Oak Ridge Golf and Country Club included: Nelson Tibbatts, W. C. Countiss, Jim Bartholomew, Palo O'Neal, Art Hines, Jack Spears, A. L. Sawyer, C. C. Morgan, George Mitchel, Bob Orrison, Charley Peterson, John Boyd, Jay gan, George Mitchel, Bob Orrison, Charley Peterson, John Boyd, Jay Holzknecht, Ed Gambill, George Oliphant, Harold Duncan, Harold Ratjen, Gentry Underwood, Jack McLendon, George Ferry, J. P. McMillan and Ray Whitehorn.

Boyd-Oliphant Tops In Golf League

John Boyd and George Oliphant moved into first place in the Y-12 Plant Golf League at Oak Ridge last week by winning six big points from Jack McLendon and Gentry Underwood. Charley Peterson and Jim Patterson got on the winning trail by winning four tallies from the combination of Elmore Koons and John P. Smith. Other league action saw Art Hines and Logan Emlet split six points with Jay Holzknecht-Paddy Peckman while the duo of John Sny-der-Harold Ratjen also divided six points with Bob Orrison and Har-

Art Hines had low gross score last week, a neat one under par, 35. Hines also won low net honors with a 31. Logan Emlet pulled a trick shot out of the bag that gave him a birdie on No. 10 hole.

The schedule for next Wednesday, July 27, pits Ratjen-Snyder vs Holzknecht-Peckman, Mitchel-Mathews vs Boyd-Oliphant, Orrison-Saylor vs Smith-Koons, Patterson-Peterson vs McLendon-Un-

Second Half Play Starts In Knox Loop

The Y-12 Plant Golf League at Whittle Springs in Knoxville has started play in the second half after George Heins and I. G. Speas won the first half bunting. The second half schedule allows matches to be played on any day of the week extending from Sunday through Sunday. All results of matches are to be reported to Joe Miller, who is the league secretary, Bldg. 9739, telephone 7508. The schedule for the week of

July 24 pits Burrus-Rowan against Lockhart-Peterson, Sawyer-Lud-wig vs Morgan-Miller, Hunter-Schappel vs Kovach-Breman, Hus-kisson-Wilburn vs Bowles-Duncan.

G Shift Picnic Set For July 23

The big G Shift picnic will be held this Saturday, July 23 at Big Ridge State Park. It will be an allday affair with everyone coming early and staying late. All em-ployees working on the G Shift with their families and guests are invited to attend the big event. Families will bring their own lunches with the food being spread at the noon hour.

Various types of entertainment for the children as well as the adults have been planned by the G Shift Recreation Committee.

Inspectors of the H Shift and J

Shift who work with G Shift employees have been invited to attend the shindig.

TWO FINE COMBINATIONS IN THE Y-12 GOLF LEAGUE AT OAK RIDGE ARE SHOWN ABOVE. FROM LEFT Lamar Mathews and George Mitchel, who make up a two man team in the loop. H. W. "Paddy" Peckman and Jay Holzknecht is the other tough twosome shown. Peckman and Holzknecht won the first half championship in the league.

Information On Vacations Available To Y-12 People

A vacation and tour guide service is available to all Y-12 employees. The Y-12 Recreation Department, Bldg. 9704-2, telephone 7751, can be helpful to vacationers the year round by helping to select

a spot to spend leisure time or by® providing information on vacation places throughout the United States. Many hundreds of vacation folders including maps, places to stay, scenic spots, recreational facilities and other valuable information can be used just for the asking.
The demand for travel informa-

tion is especially heavy during the summer season. All Y-12ers who are planning on taking a vacation trip are invited to come by the Recreation Office and select the folders needed. Extra copies of the information may be taken from the office and used during the vacation trip.

Information on beaches, state parks, many historical sights and street maps of many of the larger cities are available. Neighboring states such as Florida, North Carolina, Alabama, Georgia and South Carolina furnish large numbers of vacation folders. A full supply of information about the various beaches throughout the United States always prove to be popular with many Y-12 vacationers.

Horseshoe League Action Limited

Only one match was completed in the Y-12 Horseshoe Pitching League last week due to wet grounds and agreed postponements. The Pioneers, Jim Haggard and C. W. Toney, were red hot trimming the Sliders, who are Charley Gillihan and Al Bissell, by a three-point margin.

The H & H crew of Bill Hackett and H. L. Horton remain atop the standings in the league with a record of 17 wins and only four

FIRST AID IS URGED

At least one member of every vacationing family should know basic first aid, says the Institute For Safer Living. Far removed from medical help, knowing resuscitation, treatment for burns, to dress a wound or set a broken bone, what to do for snake or insect bites or poisons, proper treatment for sunstroke or heat prostration is important to the vacation safety of all members of the family.

"Atoms for Peace" Conference in-cludes Oak Ridge National Laboratory Assistant Research Director, Dr. R. A. Charpie. He is acting as assistant to Dr. Walter Whitman who is in charge of this f National Carbon Company.

Y-12 Pistoleers Continue Firing

Team No. 2 in the Y-12 Plant Pistol League moved to undisputed first place in the loop after firing recently at the Oak Ridge Sportsmen's Association range. The new leaders won both scratch and handicap firing from Team No. 4 by 515 to 497 scratch and 578.241 to 577.328 handicap. Team No. 3 topped Team No. 1 by a scratch score of 522 to 501 and 579.281 to 577.006 handicap. John Ezell, of Team No. 3, post-

ed a 274 scratch and 291.345 with handicap to lead all shooters. T. J. Bush topped Team No. 1 with 259 scratch and 288.623 with handicap. P. H. Williams was high scratch scorer on Team No. 2 with 265 while M. L. Woodard was high handicap man with 290.445. On Team No. 4 D. R. Alford posted the high scratch scoring with 257 while J. H. Rowan led the handi-

cap men with 289.260. Y-12 and the Oak Ridge National Laboratory are tied for first

place in the inter-plant league.
The Y-12ers will fire again on
Thursday, July 21, at the Oak
Ridge Sportsmen's Association

League standings follow: Team No. 2
Team No. 3
Team No. 4
Team No. 1

SUN EFFECTS DIFFER

Knowing the difference between heat prostration and sunstroke is important life-saving information for vacationists, advises the Institute For Safer Living. In heat prostration, the body is cold, clammy and bluish-pale. Treatment is to bring body temperature up to normal, so warmth is required. In sunstroke, the body is dry, hot and red—the treatment is to bring the body temperature down to normal by cooling devices such as shade, fanning and cool water.

has returned to work after illness. C. R. Eichelberger, Process Maintenance, and family are visiting relatives in St. Louis, Mo. . . . J. J. Three Tilts Played In Tennis Ladder

Action in the Y-12 Women's Singles Tennis Ladder was fast and furious last week as three fine matches were played. Mary Cusman moved up to second place on the ladder by defeating Ruby O'Kain by 6-2, 3-6, 6-3. Nell Mc-Ginnis repulsed the challenge of Lois Secrist by 6-1, 6-1 while Sue Strange trimmed June Sherrill by 6-1, 6-1.

The ladder will welcome any newcomers who would like to join the group. A telephone call to the Y-12 Recreation Office, telephone 7751 or to Sue Strange, Bldg. 9212, telephone 7-8487 is all that is necessary to join the ladder.

The latest ladder standings fol-

- Elizabeth Patrick
- Mary Cusman Ruby O'Kain
- **Nell McGinnis**
- Lois Secrist 6. Helen Brown
- Sue Strange
- 8. Frankie Dubose June Sherrill 10. Helen Gombita

Question: Is there an advantage to financing an automobile through my own UNION?

Answer: You not only avoid paying fees and hidden charges, but besides a low rate of interest, your loan is insured in that if you die or are disabled, your loan is automatically paid up and your family is left without obligation. This feature applies to all loans.

Discontent is the first step in the progress of a man or a nation—Oscar Wilde.
